

SOUNDPORTER

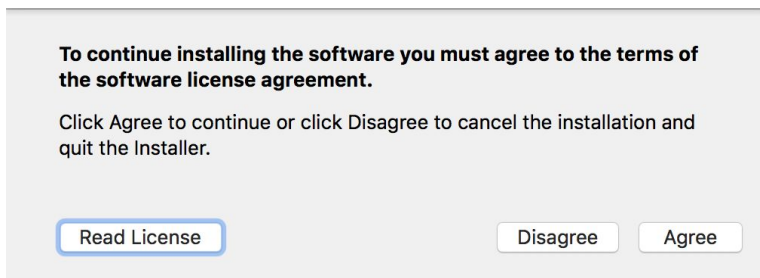

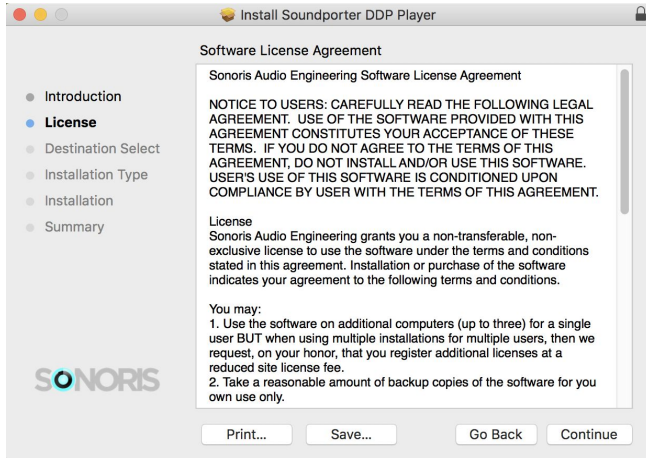

AUDIO MASTERING

DDP Player Installation / Activation Guide - Mac OS

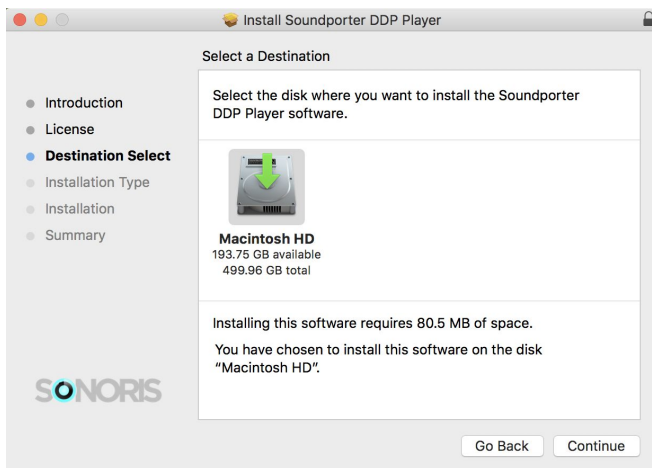

Download / Installation

1. Go to www.soundporter.com/ddp and download the appropriate DDP Player version for your Mac OS computer.
2. Double-click the downloaded file to start the installation. Follow the on-screen prompts:

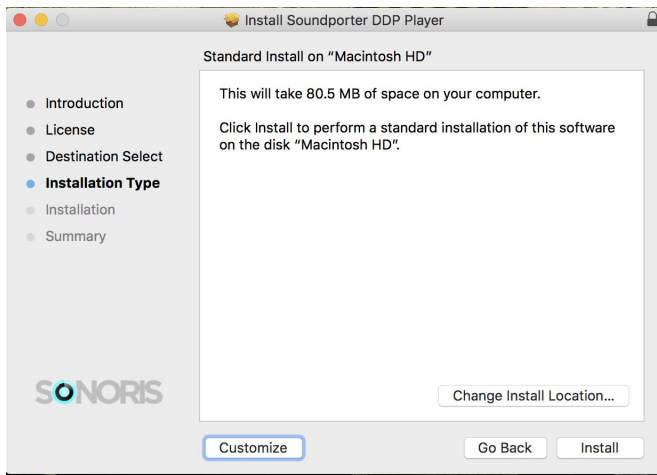

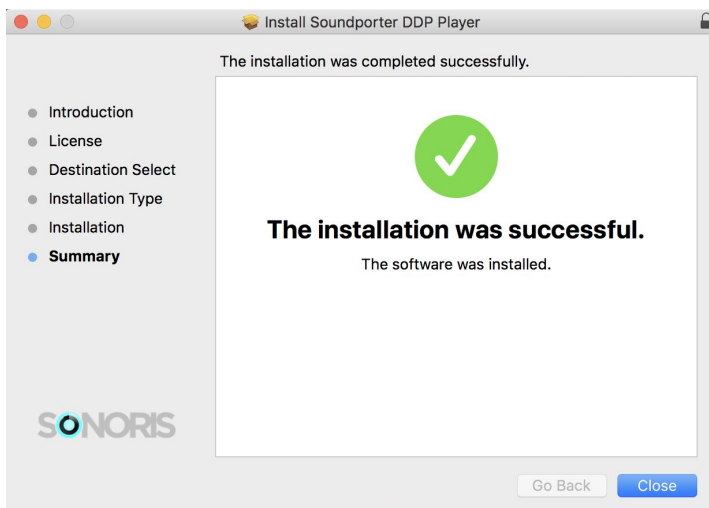

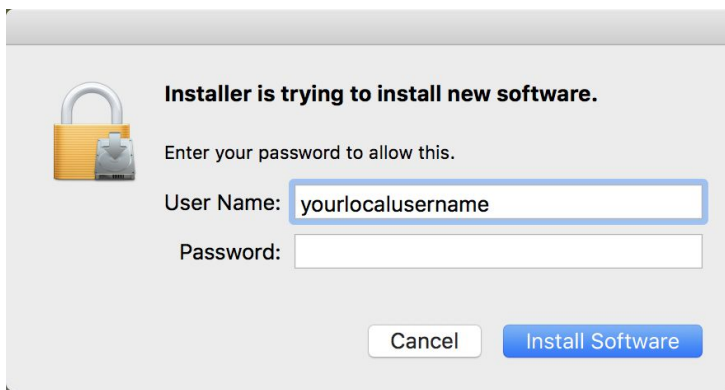

Here, you can select any destination harddrive location you wish.

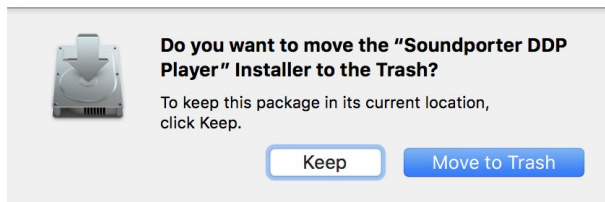

Select the appropriate location where you know you can find the DDP player after installation.

This username/password is the user/password of your *local* machine.

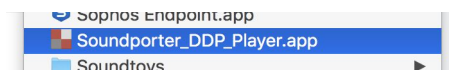

You may be asked if you wish for the downloaded file to be deposited in the Trash. Feel free, but if you think you might need the player later, it may be worth hanging onto.

Activation

1. Start the application. Double-click on the **Soundporter_DDP_Player.app** application.

This software is presented to you by Soundporter
